## MatSE professor included on "2005 Scientific American 50"

Professor John Rogers

John Rogers , a professor of materials science and engineering at Illinois, is included on a diverse list of individuals and organizations whose contributions to science and technology are recognized by the "2005 Scientific American 50." The prestigious list is featured in the December edition of Scientific American , the nation's premier science magazine. Rogers is recognized as a "Chemicals and Materials Research Leader" for work in the area of plastic electronics. A profile of his... [Read more >>](#)
