[OUR HISTORY](#)

[LEAVE A LEGACY](#)

To celebrate 125 years, we selected 125 Extraordinary Exes to show that what starts here truly changes the world. We know that there are many more alumni who have done great things and we are counting on you to tell us about them! We want to hear from you. **Submit an extraordinary ex to the list!**

Questions? Feel free to contact us at extraordinaryexes@alumni.utexas.edu.

Inventors/Researchers

Jennifer Moody is a Research Fellow at the University of Texas and co-author of *The Making of the Cretan Landscape*.

John Rogers is a materials scientist, known for his constitutions to applied physics.
